

Bonner County Amateur Radio Club A Day For Contact

Hello, I would like to make the following announcement on behalf of the Bonner County Amateur Radio Club. Please share with your club members and area HAMs.

BCARC will be on the air Saturday June 1st. The club's goal is to make local and regional contacts on the 40-meter band.

BCARC will be utilizing multiple transceivers and antenna styles. This will include an NVIS Antenna (Near Vertical Incident Skywave).

BCARC invites Amateur Radio Operators having HF or NVIS capabilities to get on the air and make contact with us.

BCARC will utilize the North Idaho Repeater Group's repeater systems throughout the day in announcing the HF frequencies being utilized for this event. www.blossompeak.org

If you would like information on this activity, please contact any of the BCARC board member by visiting BCARC's website at www.K7JEP.org .

Thank you
KG7CSD
